

MINIMIZE YOUR PLASTIC USE BY USING AN *IONIZING* WATER BOTTLE ON THE GO

We have heard the news stories of plastic land fills and plastic in the ocean. There has been a new wave of people switching from plastic water bottles to reusable ones. Despite this change, water bottles are often expensive yet do not have the features that many of us would prefer they have or they are affordable but do not last long.

Luckily, with the **Aqua Magic H2 Hydrogen Bottle**, the people can get what they want: a long lasting water bottle and a built in water ionizer. Having a water ionizer within the bottle is essential to the health and wellness of our bodies. It can help increase the amount of antioxidants our bodies absorb as well as our hydration levels.

Antioxidants are important for our bodies functions in that they can protect against cell damage that free radicals, or oxidative stress cause. We can increase our antioxidant intake by eating foods rich in antioxidants. However, with an ionized water bottle, then people can enjoy foods without stressing about how much food they are eating and keeping track of what kind of food as well. Since this water bottle acts as an antioxidant and hydration booster, it is a two in one problem solver.

“The Aqua Magic H2 seamlessly delivers an increased amount of benefits instantaneously into your body without unwanted additives.”

Although a bit pricier than a standard water bottle, it is for a good reason, *it is not a regular water bottle but a cool water bottle*. It may not seem very thrilling but with its built in features, it can improve your body's overall wellness. And when we feel good physically, this transcends to how we feel mentally. By staying hydrated and having high amounts of antioxidants, then energy levels increase dramatically.

There are multiple benefits to this bottle that make it stand out compared to others:

- Increased Body Hydration
- Perfect Hydrogen Levels
- Combat Free Radicals
- Hydrogen 800+ ppb
- 10x Anti-Oxidants
- Battery Operated
- Smooth Taste

All these benefits to the body are possible due to the hydrogen levels set at 1.6 mg/L, which has more antioxidant molecules than vitamin C. This hydrogen rich water improves the functionality of body cells and assists the body's antioxidants defense system to stop free radical damage.

With all these functions, one would imagine that it would be hefty to carry and maintain. Fortunately, it isn't. This bottle is battery charged and is rechargeable and it is lightweight for on the go journeys.
