

Water Filters on the Go

As the environment shows increasingly alarming problems due to waste, it is vital that we begin taking measures to protect the planet from further impact.

Not everyone recycles or can change their diet but everyone can start using reusable water bottles instead of plastic ones. It may not sound like much, but if a person regularly buys a water bottle once a day, then the replacement of a reusable bottle can drastically reduce plastic use.

Reasons to own a reusable water bottle:

- Reduce waste from plastic use
- Save money
- Better for your health'
- Control what you put in it

Why is the **Aqua Magic H2 Hydrogen Bottle** better than a regular reusable bottle?

Unlike other water bottles, the **Aque Magic H2 Hydrogen Bottle's** filter is designed to clean and replenish the body's hydration with antioxidant resolution.

While a reusable water bottle is helpful in general for the environment and for your health, filtered bottles such as the **Aqua Magic** can have a stronger impact since it is ionized. A reusable bottle such as this can be useful for outdoor activities, traveling to different countries, and simply everyday use.

It may be confusing how it all works, but it is easy to use and recharge. How can you say no to water that does not have that weird taste? Its truly an investment on your health.

Its hard to say no to all this:

- Increased Body Hydration
- Perfect Hydrogen Levels
- Combat Free Radicals
- Hydrogen 800+ ppb
- 10x Anti-Oxidants
- Battery Operated
- Smooth Taste
